

# Welcome to Groovify!

Groovify is a fun, copyright-free music app designed to make discovering and enjoying songs easy and personal. With simple navigation, secure logins, and a clean, consistent design, Groovify helps you explore music without confusion or clutter. Everything in the app is built around simplicity, personalization, and reliability — so you always feel at home while you listen.

## Getting Started

When you open Groovify, you'll see a friendly login screen.

- Returning users can sign in with their username and password.
- New users can create an account using a valid email, a unique username, and a secure password.

If something doesn't match, you'll see a helpful error message. Once logged in, you'll go straight to your Home page. You'll stay signed in until you log out or your session ends.

## Navigating the App

Moving around Groovify is simple and familiar.

- At the top of every screen, you'll see the Groovify logo on the left, the page title in the center, and your profile picture on the right. Tapping your profile picture opens your personal settings.
- Along the bottom, a navigation bar lets you switch between Home, Songs, Playlists, and Search. The tab you're on is always highlighted, so you'll never lose your place.

## Your Profile

To view or edit your profile, tap your profile picture in the top-right corner.

You can:

- Update your username (3–32 characters)
- Add or change your description (up to 250 characters)
- Upload a new profile picture
- Choose your favorite genres to help Groovify recommend songs you'll love

These settings let you make the app truly yours.

## Home

The Home tab is your personal starting point. Here you'll see a Recommended section with five songs chosen just for you, based on your favorite genres. You'll also find a Developers section — tap Us to learn more about the people behind Groovify.

## Songs

The Songs tab is where you can explore all the music Groovify offers. Each song shows its album artwork, title, and artist. Tap any song to start playing it — it will appear in the Media Bar at the bottom of the screen.

## The Media Bar

When you play a song, the Media Bar appears so you can easily control your music. You can:

- See the song title, playback time, and total length
- Move the slider to skip or rewind
- Adjust the volume
- Use the back and forward buttons to change songs
- Collapse or expand the Media Bar with a quick tap on the arrow

It's everything you need to control your listening, all in one place.

## Playlists

The Playlists tab is your music hub. You can:

- Create and name new playlists
- Add or remove songs anytime

Your playlists make it easy to organize your favorite songs exactly how you like.

## Search

Looking for something specific? The Search tab helps you find songs quickly. You can search by genre or song title, and you don't even have to type the full name. For example, typing "ro" will show all rock songs, and "co" will find songs with that sequence in the title. Each result shows the song's image and artist — just tap to start playing it.

## A Few Design Notes

Groovify's interface is designed to stay clean and easy to use:

- The top and bottom bars stay visible on every page for simple navigation
- The current page is always clearly marked
- Text and icons are easy to read and recognize
